

CONCRETE GLUE

TECHNICAL DATA SHEET

PRODUCT DESCRIPTION

A high performance liquid additive bonding adhesive formulated for bonding new concrete, mortar or gypsum plaster to existing surfaces. Easy to apply, it avoids the need of roughing or scoring old surfaces.

PREPARATION

The surface should be structurally sound and free of oil, grease, paint, dust, dirt, and foreign materials. Glossy surfaces should be dulled by sanding. Additional water should be added to the **CONCRETE GLUE CONCENTRATE** depending on the consistency and bond strength desired (Until 1 gallon per pail).

COVERAGE

Coverage will vary depending on the dilution used, and on the porosity and texture of existing surface.

1 gallon covers 250 – 350 sq. ft. (23 – 33 m²)

5 gallons cover 1,250 – 1,750 sq. ft. (115 – 165 m²)

STORAGE

Store in a tightly closed container in a dry place. Close container after each

APPLICATION

Concrete surfaces to be repaired should be damp but have no standing water. Apply **CONCRETE GLUE CONCENTRATE** by brush, roller or spray of a thickness of a coat of paint. Can be applied to a dry or damp surface. Fresh cement topping or plaster may be applied after the surface has become tacky (depending on the weather conditions it can be between 10 minutes and a half an hour).

USES

CONCRETE GLUE CONCENTRATE can be applied for permanently bonding new concrete, mortar or plaster to old concrete, mortar or plaster. It can be used in interior and exterior applications. Adheres new concrete, toppings, and Portland cement plaster or repair material to floors, walls, sidewalks, concrete pavements, curbs, and steps. There is no need for chipping, drilling or roughing the old surface before application. **CONCRETE GLUE CONCENTRATE** is also used as primer for Self Leveling applications.

CAUTION

Avoid eye and skin contact, wear approved safety equipment, goggles and gloves, if eye contact occurs, flush immediately with water for 15 minutes and consult a physician. Refer to the MSDS for additional information.
